

March 26, 2020

Dear Patient of Katzman Eye Associates,

We care about you and your eye health. We are still available to take care of any urgent eye care needs during this difficult time. You can reach one of the physicians by calling our main office number.

We also want to let you know some exciting news about Katzman Eye Associates and how we have been preparing for our future.

Our practice, which has been serving patients with skill and compassion for 40 years, will be joining forces with Wills Eye Hospital, the premier eye hospital in the region. We will officially be merging with Wills in April 2020.

We have had a consistent and ongoing relationship with Wills through the years. We will continue to see patients in our current office here and add additional Wills physicians as our practice grows. We are confident that this transition will ensure our practice's ability to thrive as we take care of your urgent needs now and your overall eye health long into the future.

While you will likely notice some changes, such as the signs in and outside of our office and our stationery, some things will not change at all. We will return with our physicians and staff to our normal office hours and services, including the Optical Shop. Please check our website, www.katzmaneyes.com, for information and updates. In other words, we are planning to continue providing the same level of excellent eye care, with the larger institution we respect and admire behind us all the way.

Thank you for your loyalty to our practice in the past — we very much look forward to caring for you into the future.

Most sincerely,

Jeffrey I. Katzman, MD, FAOO
Kelly M. Epstein, OD
